Introduction

Ever since the intersect between Bitcoin and modern finance has existed, there has long been talk of regulation for Bitcoin and eventually other cryptocurrencies, if and how they should be regulated, alongside debates on how radically the introduction of Blockchain could work to change and modernise current regulatory frameworks,globally.

From Twitter to Supreme Courts, there have been many arguments posed by crypto enthusiasts, investors, developers and lawyers alike. The popular catchphrase *'Code is Law'* has been adopted by Bitcoiners and developers across the crypto industry, with many lawyers, government agencies, law makers and judges either totally confused at the sentiment, or understanding enough to break down the nuances of how the two worlds coincide.

Crypto lawyers disseminate information and research, dispelling or expanding on some of the uncertainty surrounding how blockchain and code can work with law to build a more modernised, decentralised and improved monetary network, regulatory framework and overall legal system.

Developers argue finality, distributed ledgers, privacy, freedom and the road to creating a fairer, more robust and updated regulatory framework and legal system, through the use of Bitcoin, blockchain technology and smart contracts. This is what the builders of these networks stand for, utilising software to fix and in some case counter what is deemed as a broken system.

Never before has a live event taken place around this debate, but it will now...followed by an evening of networking, drinks and live music with an entertaining and immersive after-party!

About the Event

"Code is Law Vs Code & Law" is an immersive event designed to explore the intriguing intersection between law, blockchain technology, and the burgeoning world of cryptocurrencies. Inspired by the popular catchphrase 'Code is Law', we aim to delve into the realms of regulation and legal frameworks concerning digital transactions, and the potential role of code in shaping our future societal interactions.

The event will open with a series of educational sessions designed to take attendees through the intricacies of blockchain technology, cryptography, smart contracts, and the programming languages powering them. We will dissect complex issues like the nature of anonymity online, the fundamental regulation potential of code, and how values from our constitutional tradition can be embedded in the digital world.

The main arguments of **Lawrence Lessig**, the original proponent of the **'Code is Law'** concept, will be discussed extensively. We will examine how code and law need to collaborate to effectively govern the internet, and consider the implications of a world where code might replace traditional law across many interactions.

About the Event

As we navigate through the event, we will also consider how code regulates transactions and dispute resolution in instances like credit card disputes, security deposit agreements, divorces, immigration cases and traffic violation appeals. We will ponder whether an automated governance structure can indeed change the nature of law online, and if so, what its limitations might be.

Highlighting the practicalities, we will host expert panels featuring developers, lawyers, and a renowned anthropology professor to offer a well-rounded perspective on the topic. These discussions will tackle key issues such as the regulation of NFTs, the balance between code and law, and the societal implications of 'Code as Law.'

As a climax to the intellectually stimulating day, we will stage a lively Fireside Debate between developers and lawyers. This debate, built on the foundation of the day's discussions, aims to provide a platform for open discourse on whether code is law, or simply a tool to assist it.

In conclusion, whether you're a developer, lawyer, or simply a tech enthusiast, "Code is Law V Code & Law" offers a unique opportunity to deepen your understanding of this complex issue and engage in a debate that could help shape the future of our digital society.

The Venue

Queen's Gate House
Locality: Kensington, London

Features: 2 Event rooms, Outdoor Balcony Area, Award Winning Historic Location, State-of-the art AV, Easy Access to transport links

We've planned an evening of live music and entertainment to follow up the daytime conference!

Attendees will enjoy music from DJ's and a special performance TBA.

For the conference and after-party we have chosen to utilise the award winning Queens Gate House, a prestigious and beautiful venue opened by Her Majesty Queen Elizabeth II herself in 1961.

Based in the heart of Kensington, London an area that has become familiar with crypto events and enthusiasts alike, over the years.

The a main event room is able to accommodate the most uniquely styled events, with a capacity of up to 300 per room!

Agenda

13:00-13:40
Doors Open/ Registration

13:40-13:45
Event Agenda, Housekeeping & Fire Saftey

13:45-14:00
Intro: Journey into the intersectionof Law and Code

14:00-14:20
"Code is Law" Explained: An Overview of the Concept

14:20-14:45
The Language of Code: An Introduction to Solidity and Smart Contracts

14:45-15:10
Rethinking Regulatory Frameworks: How Blockchain Technology is Shaping Modern Law

15:10-15:40
Lunch Break - Networking & Snacks

15:40-16:10
Developer Panel: Building a Decentralized Future - The Implications and Potential of Blockchain

16:10-16:40
Emerging Challenges and Opportunities for Regulation in a Blockchain-Driven World

16:40-17:05
Exploring NFTs: Key Legal Considerations and Issues

17:05-17:35
Lawyer Panel: Balancing Code and Law - Regulation in the Age of Cryptocurrency

17:35-18:00
Transitional Period - Reflections and Insights - Human Code & Law

18:00-18:15
Key Sponsor Presentation: Bridging the Divide Between Code and Law

18:15-18:45
3v3 Fireside Debate | Code is Law + Q&A

19:00-19:35
Closing Remarks: Reflections on the Day and the Road Ahead

19:35-23:00
Evening Reception & After-Party

Audience & Attendee Breakdown

General

- Bitcoin/Crypto/Blockchain Enthusiasts
- Technology Enthusiasts
- Futurists
- Business Owners
- Startups

Topics

- Code is Law - The Meaning
- Can Code be Law?
- The History of Law and Code
- Coding for compliance
- Regulation or Self-Regulation
- Disruption = Legislation?
- Undertsanding Crypto taxes
- IP and Copyright in Blockchain
- UK Crypto Regulations & Consultations
- Consumer Protection
- Crypto Advertising Laws
- Your voice counts — Connecting with Policy Makers

Media

- Journalists
- Editors
- Blockchain sector reporters
- Crypto Bloggers/Vloggers
- Crypto Influencers

Code

- Dev Ops Managers
- Development teams
- CyberSec
- Software Programmers
- Fintech companies
- Junior Developers
- Programming Students

Law

- Regulators
- Compliance Officers
- CyberSec
- Lawyers
- Crypto Organisations
- Fintech companies
- Government Bodies
- Law Students

## An open community platform for self-regulation

It doesn't all end once we've closed the doors on event day!

We'll be back annually to bring the years to come into review as we advance towards an ever-more interconnected existence.

Going a step further than just another event, we are in the process of constructing an online forum to bring together lawyers, developers, regulators, investors, industry professionals and members the public in on-going year round online discussion.

We understand and want to convey the importance of the dicourse surrounding emerging technologies and how, if or when they should be regulated. More than just a consultation paper, public survey or centralised decision making process, the codeislaw.live community is about bridging the gaps in education and communication of innovations and the regulatory frameworks which surround them.

If you care anthing about freedom, trust, privacy and the protection of lawful rights, and are working or studying within the fields of Law, Compliance, Finance, Computing or Technology then the codeislaw.live forum will be a great place to showcase, network, discuss and pose questions around how Code and Law shape our collective future.

Tickets

Std. Entry

£10 Non-members

VIP

£50 Non-members

£30 STX:LDN Member

Includes Q jump for non-members

Access to VIP areas

VIP Package

£399 Non-members

£349 STX:LDN Member

Includes reserved table (Up to 5 people), Q jump, Bottle of X

If tier 3 member - 1 free beer/house wine/soft drink per person

Memberships

Memberships

STX:LDN Memberships are available in 3 Tiers of NFT, for early supporters.

The collection is limited to 312, so all are subject to availability.

Why become a member?

STX:LDN members can take advantage of a number of lifetime privileges that come along with being a member, such as; Q Jump, Partner offers and incentives, Stacking pools, governance voting and even free drinks at events hosted by STX:LDN!

How to become a member

You can become a member by claiming one of the 104 FREE Tier 1 member NFTs, or by purchasing anyone of the other tiers.
