ULTRAREAL SYLLABUS

A4534x TECHNIQUES OF THE ULTRAREAL
A4542x IMAGINING THE ULTRAREAL

Phillip Crupi- pwc2110@columbia.edu
Joseph Brennan- jab2315@columbia.edu

Fall 2017
Wednesday 7-9PM
Avery 600 - Ware Lounge
Office Hours: Wednesday, 9PM

Description
The use of perspective and rendering is often an afterthought. With the abundance of 3D modeling software and the ability to see every angle of a project instantaneously, renderings are often thought of as a last minute tool for representation. This class challenges the participants to not only think of rendering as a method of presentation, but also a tool for design. We encourage the use of perspective and rendering early and often in the design process. In addition to learning techniques for creating ultrarealistic images, we will teach a workflow that encourages early exploration. We will focus on color, light, material, context, reflection, and opacity throughout the course of the entire design project. Will will look for inspiration in many places, including art, photography and cinematography.

The class will use V-Ray for 3D Studio Max as the main engine for exploration, but will also encourage the use of other modeling applications, post processing software, and 3rd party plug-ins. Students will also be required to explore additional methods of composition, including sketching and photography. No knowledge of V-Ray or 3DS Max is required, but students should be able to model in an application of their choice. The class will focus on Rhino and 3DS Max as modeling tools.

Class Structure
Classes will consist of a combination of student presentations, lectures, and software demonstrations. There is a more detailed breakdown of each class in the schedule below. Other instructional video tutorials will be found online at digicon-nyc.tumblr.com. There will be weekly office hours with teaching assistants and critics, as well as several weekend working sessions with critics. Please note, that online tutorials and office hours are not a substitute for attending lecture.

Session A will start to explore the basic aspects of the rendering process, including but not limited to modeling, cameras, lights, and material. Session B will expand on these ideas and delve deeper into each aspect, as well as introduce additional techniques. Students who take session B are highly encouraged to take session A.

Grading is dependent on multiple factors. The first is weekly progress and participation. We will check blogs on a weekly basis. In order to achieve the level of quality that this class requires, it is necessary to test and revise the techniques that we show you each week. A few groups will be asked to present their progress in the beginning of class throughout the semester. The second factor in grading is overall quality of midterm and final images.
**Project**
Students will be encouraged to work in groups of up to four (4) members for the semester. Deliverables will be the same for each group, regardless of number of students. The project will consist of a small scale pavilion or other architectural object that will be developed and presented through rendering. The focus of the images must be the exploration of this project through three scales. Environment and context will play a supporting/secondary role to your focal design. Images will be uploaded to a team website each week, and critics and assistants will provide feedback. **The project must be new, original work.** Students are not allowed to use an existing project or previous studio work. You must design, model, and render a project from scratch.

In addition to the project, there will be small assignments throughout the course of the semester. Each group must create a Tumblr blog and upload assignments and progress images on a weekly basis. See attached project description for details. Blogs will be reviewed in class each week.

**Schedule**

**September 6th - Intro**
**LECTURE:** Visual Studies presentation, project intro, and project walkthrough
- Introduction to the class and review syllabus
- Walkthrough sample project
- Discuss major goals for a rendering project
- Website explanation
- Session A and/or B explanation
- Review of first assignment
- Questions

**Due Next Week:** One sketch of a proposed perspective for each student, uploaded to blogs

**September 13th - Photography & Composition**
**REVIEW:** Perspective Sketches
- Several groups will be selected to present their sketches

**GUEST LECTURE:** Composition
-- Gian Colangelo

**LECTURE:** Photography and Camera Techniques
- Digital SLR Camera Set-up
- F Stop
- Shutter Speed
- Composition set up

**September 20th - 3D Modeling in Rhino for Rendering**
**REVIEW:** Perspective Sketches 2
- Several groups will be selected to present their updated sketches

**DEMONSTRATION:** Rhino Bootcamp
- Modeling techniques, specifically for Floors, Windows, & Repetitive Elements
- Modeling to a high level of detail
- Prepping your Rhino model for rendering
- Exporting to 3DS Max using DWG, OBJ, and 3DS. Pros and cons of each.

**DEMONSTRATION: Intro Photoshop**
- Photoshop Perspective Correction
- Image Cropping & Composition

---

**September 27th - Lights, Camera, Vray**

**REVIEW: Photo Assignment**
Selected groups discuss photos

**DEMONSTRATION: Vray Basic Settings**

Vray Basic Settings
Saving Settings for Batch Rendering

Basic Lighting
Setting up Cameras
  - shutter speed
  - f stop
  - white balance
  - vignetting
  - tilt/shift
  - perspective correction

Basic Materials
  - WHITE 200
  - GLASS

Rendering & Saving

---

**October 4th - Materials 01**

**REVIEW: White Renderings**
Selected groups discuss white renderings

**LECTURE: Bump, Reflection, Diffuse Maps**

**DEMONSTRATION: Procedural Materials**
Modeling in Max for specific materials

Procedural Materials
  - Titanium
  - ETFE
  - Metals
  - Water
  - Chrome
  - Plastic
  - Channel Glass
  - Frosted Glass

**Due Next Week:** Material Palettes
October 7th & 8th - WEEKEND DESK CRITS

October 11th - Materials 02
REVIEW: Material Palettes
Selected groups discuss material choices
LECTURE: Project Examples with Materials
DEMONSTRATION: Materials
Bitmap Materials (Arroway, CG Textures, Dirt Maps)
- scale
- bump, displacement, reflectivity
- UVW Map modifiers
- Material IDs

October 14th & 15th - WEEKEND DESK CRITS

October 18th - Materials 03
REVIEW: Three Final Views
Selected groups discuss selected views w/ 1 refined material
DEMONSTRATION: Custom Bitmaps
Using existing bitmaps to compile and create new ones
Extracting geometry to create maps
Creating maps from scratch
Dirt Maps
FSSS2
Crazy Bump

October 25th - Composition and Site Context
LECTURE: Context
DEMONSTRATION: 3DS Max and Photoshop for Custom Environments
Grass, rock, paths using Photoshop
Proxy Objects
Creating rocky cliff face using Photoshop and displacement
Environment fog and containers
Environment Maps
DEMONSTRATION: Forest Pack
Advanced context modeling
Forest Pack Pro plug-in

November 1 - Collage Images
REVIEW: Context Images
Selected groups review their images with context
DEMONSTRATION: Custom Photo merging and collaging
How to collage Photos with renderings
Extracting render elements
Perspective Matching in 3D Max
Photoshop Blending Techniques

November 8th - Lighting
REVIEW: Collage Swap Assignment
Selected groups review their collaged swap assignments
LECTURE: Lighting Systems
DEMONSTRATION: Interior Lighting
Advanced lighting
Interior lighting
IES profiles

November 11th & 12th - WEEKEND DESK CRITS

November 14th - Advanced Post Processing
REVIEW: Night Time Renders
Selected groups review night renders
LECTURE: Advanced Post Processing
DEMONSTRATION: Realflow
DEMONSTRATION: Advanced Post Processing
Using Vray render elements
Adjusting levels
Layer masks
Lens blur / depth of field
Using After Effects / Magic Bullet / Volumetrics
Due Next Week: First draft renders of final images

November 18th & 19th - WEEKEND DESK CRITS

---------------------------------------------------------------
APRIL 19th - 9/10 REVIEW ---------------------------------------------------------------
SEE REQUIREMENTS

November 22nd - NO CLASS, THANKSGIVING BREAK

November 29th - DESK CRITS

December 6th - NO CLASS, STUDIO FINAL REVIEWS

December 13th - ALL FINAL IMAGES DUE & FINAL REVIEW (TENTATIVE)
