

You See What You Want to See

Luis Miguel Pizano
David Musa
Mia Mulic
Janice Yuan Chen

You see a hat. I see an elephant swallowed by a boa constrictor. You see what you want to see.

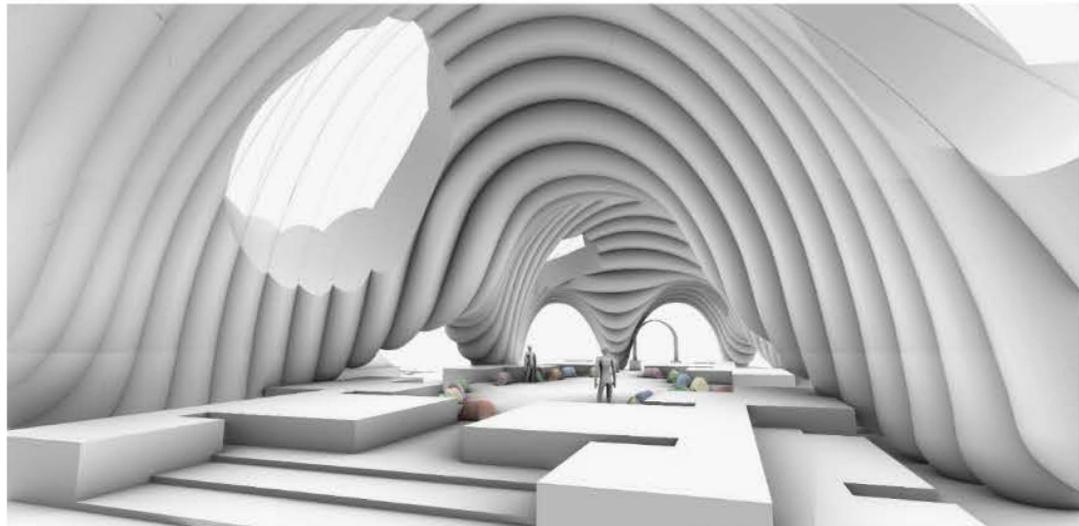

2020 has brought times of great uncertainty and moments where the light at the end of the tunnel may have been a challenge to find. Our inflatable structure invites the audience to seek for these moments of whimsical vision. As designers, light guides our imaginative exploration of our context and innovations. The light portals in the concave structure allow for this glimpse of color exchange along the playful nature of the form.
