

SPONSORSHIP OPPORTUNITIES

WHY SPONSOR?

- Direct access to pastors, church leaders, and faith-based innovators
- Unique brand exposure in an emerging faith-tech space
- Meaningful engagement with Black churches and faith communities integrating technology
- High-impact networking with decision-makers in ministry and tech

In 2025, TheoXTech convened pastors, church leaders, founders, and technologists who are actively navigating the integration of Artificial Intelligence, digital infrastructure, and emerging technology within faith-based organizations. What became immediately clear was that the conversation has shifted. Leaders are no longer exploring technology out of curiosity. They are seeking trusted partners to help them implement solutions that are practical, ethical, and scalable.

That momentum has positioned TheoXTech for meaningful expansion.

In 2026, TheoXTech will host conferences and one-day intensives across multiple U.S. cities, creating sustained points of engagement with leaders planning for long-term adoption of AI, automation, and digital tools. The vision is clear. Build deeper partnerships, foster real implementation, and continue serving leaders who are ready to move from exploration to execution.

We would welcome the opportunity to partner with you in 2026 as a sponsor. This partnership offers access to a growing network of decision-makers, alignment with a trusted innovation platform, and the chance to shape how faith communities responsibly engage technology at scale.

I would be glad to schedule a brief conversation to share more about our 2026 vision and explore sponsorship opportunities that align with your goals.

In God's Grip,
Rev. Dr. Justin R. Lester
Founder, TheoXTech
