

SYNTHETIC SOULS
MIAMI

THE VISION

Synthetic Souls is a Cinematic Experience envisioned by Artists/Filmmakers, Hasan Ali and Jeremy Baker. They have combined many mediums such as photography, filmmaking, original musical score, and live performance to transport you into the world of sentient artificial intelligence being sold by a corporation called Synthetic Souls.

Synthetic Souls has been exhibited in cities such as New York City and Paris. This time around you, the sponsors, will have an opportunity at being a part of experience.

“I visualize a time
when we will be to
robots what dogs
are to humans, and
I’m rooting for the
machines.” —Claude
Shannon, American
Mathematician

WHAT IS A SOUL?

WHAT IS HUMAN?

WHAT IS A SOUL?

WHAT IS A SOUL?

WHAT IS HUMAN?

VIDEO

One of the most detailed aspects of this exhibit is video. Artists/Filmmakers, Hasan Ali & Jeremy Baker, have narratively created stunning & dramatic video content featuring their models as Artificial Intelligence.

LIVE INSTALLATION

The live installation aspect will showcase a directed performance by Hasan Ali featuring models bringing art to life. Practical effects and makeup created by both Hasan Ali and Jeremy Baker will be applied to the performing artists. The performing artists will express the reality of the blind attempt to domineer sentient life. The story told will be a juxtaposition to the perspective within the art.

MUSIC

The main goal of this immersive experience is to transport you into a cerebral & existential journey that triggers deep

thought and emotion. The music arranged for Synthetic

Souls will feature nuanced synthesized sounds that cinematically and emotionally expand the science fiction themed experience. The score is composed by Marcos Garcia of Chico Mann, Antibalas, and Here Lies Man.

THE ARTISTS

HASAN ALI & JEREMY BAKER

Take a peek inside the minds of artists/filmmakers, Hasan Ali & Jeremy Baker. These creatives have conceived an immersive experience that showcases their love of film, science fiction, technology, and social commentary about where the future is possibly headed. They have approached this exhibit as they would a film narrative. By combining their talents of filmmaking & photography, they plan to transport everyone into a cinematic immersive experience.
