INFRASTRUCTURE INNOVATIONS SUMMIT 2018

A distinct platform for leaders and innovators to share, network and learn the status quo and future prospects of the infra-revolution.

AGENDA

DAY

Wednesday

23rd May, 2018

Start At
8:30 AM

REGISTRATION

Timing
9–9:15 AM

OPENING REMARKS CHIEF GUEST

Timing
9:15–9:50 AM

SPEARHEADING

Spearheading Housing for All by 2022

- Making Pradhan Mantri Awas Yojna financially viable.
- Augmenting affordable housing through housing finance companies and real estate builders.
- Challenges in building 'affordable' houses on already scarce urban land.
- Tapping the potential of multimillion vacant houses through rental reforms.

**9:50–10:20 AM –
High Tea (Break)**

Infrastructure – A catalyst for affordable housing

Timing
10:20–10:55 AM

- Extensive transportation network for catalysing affordable housing
- Pragmatic investments in developing corridors
- Rental housing – A complementary solution to affordable housing
- The inequation of sizable unsold inventories and supposed housing demand

Networking Break
10:55–11:30 AM

INFRASTRUCTURE

Impact of Retrofitting

Timing
11:30–12:05 PM

- Improving the building performance through retrofitting. Possibilities and Challenges
- Retrofitting techniques to convert normal buildings to seismic resistant and green buildings
- Plan for energy efficient retrofitting.

RETROFITTING

Urban Planning – Need to create liveable spaces with resilient disaster management systems

Timing
12:05–12:40 PM

URBAN PLANNING

- Setting pragmatic policies for housing increasing numbers and providing seamless civic amenities with limited resources.
- Challenges for city-planners and real-estate developers to create the optimal fusion of commercially viable and socially thriving development projects.
- Alarming need for stricter safety norms, more robust and responsive disaster management systems.

Urban Mobility Solutions for Seamless Connectivity

Timing
12:40–1:15 PM

URBAN MOBILITY

- India's vision and strategies for sustainable urban mobility over a long run.
- Potential for the application of Intelligent Transportation System (ITS) through traffic management centres to improve safety, efficiency and convenience of existing infrastructure.
- Smart parking solutions for optimal use of urban spaces.
- Innovative methods for engaging commuters into following traffic rules.

1:15–2:15 PM (Lunch)

PANEL DISCUSSION

High rise structures in India

Timing
2:15-3:15 PM

- Emergence of high-rise structures in developing economies to counter rampant urbanization and space constraints.
- Evaluating regulations impacting height limitations for high-rise structures.
- Future prospects for high-rise construction in mega-cities of India – lessons from rest of the world.
- Road ahead for the Indian codes and standards to enable domestic designers to spearhead the creation of high-rise structures in India.
- Striking a balance between architectural and engineering aspirations, buyer's expectations and developer's economics.

Smart Cities in India – A Holistic Approach for Development

Timing
3:15-3:50 PM

SMART CITIES IN INDIA

- Setting the basic infrastructure in place – Maiden step towards making Indian cities smart.
- Perceiving the term 'smart' in the Indian context with emphasis on sanitation, sustainability, employment, resource productivity, public aspirations and good governance with the touch of technology.
- FDI or innovative local funding, global smart solutions or 'Made in India' technologies, what can drive the smart city operations better?

3:50-4:20 PM
High Tea (Break)

High-rise Structures – The powerhouses of developing economies

Timing
4:20-4:55 PM

HIGH-RISE STRUCTURES

- Coalition of architectural ideas and engineering solutions for designing high-rise structures to resist wind and earthquake.
- Fusion of traditional and contemporary architecture for creating culturally, socially and economically vibrant high-rise structures.
- Evolving disaster management systems tailored for high-rise structures.
- Recent developments in collaborative computing and software for simulating the behavior of high-rise structures.
- High-performance facade to tackle the challenging climatic conditions in India

DAY

Thursday

24th May, 2018

Timing
9–9:15 AM

OPENING REMARKS CHIEF GUEST

Timing
9:15–9:50 AM

VERTICAL TRANSPORTATION

Vertical Transportation

- Intelligent VT systems for optimal waiting and transit time, adequate capacity, minimum redundant circulation and maximum safety.
- Emerging emergency evacuation systems in elevators for super-tall buildings.
- Striking a balance between the functionality, cost, user experience, space optimization and energy efficiency of a VT system from a designer's perspective.

**9:50–10:20 AM
High Tea (Break)**

Mobilizing – High performance materials and equipment in construction

Timing
10:20–10:55 AM

MOBILIZING

- Advent of high-performance construction materials in special infrastructure projects like high-rise structures, long-span bridges, tunnels, etc.
- Use of smart materials for energy efficiency in buildings.
- Implications of automated construction in labour-intensive economies.
- Integration of autonomous systems, machine learning and robotics with traditional construction equipment.

Breakthrough Innovation In Construction Systems And Methodologies

Timing
10:55–11:30 AM

BREAKTHROUGH INNOVATION

- Emerging innovations and solutions to accelerate the delivery of vital infrastructure.
- Mobilising proven management systems and affordable technology to increase the productivity of fragmented SMEs.
- Viability of 3D printing and robotics for large-scale and high-volume applications.
- Performance analysis of 3D modular construction and pre-fabricated structural components.

Internet of Things and Big Data for Improved Infrastructure Productivity

Timing
11:30-12:05 AM

IOT

- Building information modelling (BIM) for effective multi-disciplinary coordination and optimal decision making.
- Big data for optimal scheduling of construction activities, improved equipment efficiency and logistics management.
- IoT for energy efficiency, performance analysis, proactive maintenance, and safety management.

Building Resilient – Cyber-Security Systems

Timing
12:05-12:40 PM

BUILDING RESILIENT

- Identification of key threats pertinent to various cyber-systems.
- Building adequate secured and resilient systems that are capable of protecting, responding and recuperating from breaches.
- Allocation of adequate funding and dedicated teams of experts for mitigation cyber-threats.

12:40-1:40 PM (Lunch)

PANEL DISCUSSION

Policies for fostering innovation in infrastructure

Timing
1:40-2:40 PM

- Formulation of policies for innovative financing in infrastructure systems.
- Shifting role of privatization as a catalyst in infrastructure development and operation.
- Wider adoption of performance based allocation of infrastructure projects for quality and timely delivery.
- Emergence of performance assessment in projects' financial evaluations before, during and after its construction.
- Emphasis on regulations for maintaining, retrofitting and improving existing infrastructure to maximise its quality service life.
- Policies for stimulating scientific and engineering research in public, academic and private sectors.

Renewable Energy Infrastructure – Planning for a Sustainable Future

Timing
2:40-3:15 PM

RENEWABLE ENERGY

- Financial and operational strategies for fostering Indian renewables.
- Pursuit of sustainable, profitable and scalable business models.
- Role of off-grid RE units in meeting domestic demands and India's RE targets.
- Solutions to variable power generation, storage of excess energy and distribution challenges.

Augmenting EV – Charging infrastructure for India's 'Mission EV 2030'

Timing
3:15–3:50 PM

AUGMENTING EV

- Technological complexities in fetching millions of electric vehicles (EVs) in the Indian market.
- Strategies for developing ample EV charging infrastructure across the country.
- Types of business models, reliable power source, supply and storage, and type of public-private partnerships for making the EV charging infrastructure sustainable.

3:50–4:20 PM
High Tea (Break)

THANK YOU!
