Date: 19th of March

Security and Collateral for Loan Investment

Reference Number: SCR.N.00000/CMR/2019/GOLDAS/PDT

- Goldas as a consumable sports concept with current markets in West, Central and Southern Africa can confidently be classified in its right as: Intellectual Equity. As an Intellectual Equity already being consumed, the concept itself forms its first collateral because it can easily be sold for recoveries.
- Goldas is currently investing significantly in acquiring asserts (including land, buildings and construction of fields...), reasons why we need investments. All these asserts around the world, will become sufficient collateral.
- We are pushing hard in acquiring banks as partners to back us up in moments of challenges.

NB: As more GOLDAS National and Continental Federations become members, running games with annual percentages entering GOLDAS reserves and with all of them paying annual dues, we will make up. All big businesses that follow sports for publicity, will make us capable of sustainability and when we will start marketing TV licenses, GOLDAS Fabrics and Software... We will be more than able. Sports is the leading world's business and we have the experts that it takes.
