Housing has been a prime site for experiments throughout the history of modern architecture. The principal locales, forms and aspirations have changed, of course. Today’s modernism no longer promotes a single standard; architects realize that innovation does not preclude comfort, familiarity or delight. “Modern housing” confronts questions of inequalities (within and between nations, classes, groups and genders) as well as new materials and technologies. Recent housing relates to “dwelling” in engaging both a universal human need and a diverse panoply of forms, desires, habits, emotions and social conditions. Site plans as well as floor plans are critical, together with a range of services within and beyond a specific site. Design prowess even extends into new realms like financing, political support and popular media.

This seminar will explore some of the key themes and examples of 20th- and 21st-century modern housing around the world. The first half of the class will survey and compare a broad range of early examples from the iconic social-democratic housing estates of Europe in the 1920s and progressive American enclaves of that era to more recent prefab prototypes, apartments and self-built barrios in Caracas, favelas in Rio and dharavi in Mumbai, new suburbs in China, “green” apartment buildings in Malaysia, as well as projects for refugees, the homeless, and what has come to be called “affordable housing” in various settings. We’ll explore multiple scales from the individual body, the room and the wall to larger composites of housing complexes, production systems, social services, environmental factors and economic challenges.

The history of design choices helps us think about architecture and policies in the present. Students in the GSAPP Housing Studio will work with students from other programs and other departments across the university. Participation in discussions is 30% of the grade. Students will choose topics for the second half of the semester and present their initial findings in class, which is 40% of the grade and the final paper 30%. Required & other readings for group discussion will be available on Canvas and on Seminar Shelf #403 in the Avery Library Reserve Reading Room.

**CLASS SIZE IS LIMITED. Please submit a short statement about your interests before Tuesday Sept. 5 to gw8@columbia.edu.**
**Week 1 (Sept. 5): What Is ‘Modern Housing’?**

The term “Modern Housing” used to mean canonical European villas aocial-democratic workers’ dwellings of the 1920s: unadorned white walls, free plans, steel and glass. While those remain foundational in architecture, we’ll also explore varied forms and social/cultural aspirations in recent decades.

Look over the seminar shelf’s books on modern housing, such as:
- Albert Ferre and Tihamer Salij, *Total Housing* (Barcelona, 2010)
- Maria Alessandra Segantini, ed., *Contemporary Housing* (Milan, 2008)
- Josep Luis Mateo, ed., *Global Housing Projects* (Barcelona, 2008)
- Graham Towers, *At Home in the City. . .Urban Housing* (Rotterdam, 2005)

**Week 2 (Sept. 13): Meanings of Home, Housing, and Domesticity**

Be prepared to discuss meanings of these words in various languages.

Recommended:
- Kristen Ring, et.al., *Urban Living* (Berlin, 2015)
- Pavlos Levas, *Dwelling and Architecture from Heidegger to Koolhaas* (Berlin, 2009)
- DASH (Delft Architectural Studies on Housing) Publications, e.g Building Together: *The Architecture of Collective Private Commissions* (2015); etc.,
Week 3 & 4 (Sept. 20 & 27): Looking Backwards and Ahead

** Prepare 5-minute presentations on a **historical** (pre-1980) “modern housing” project and its site (in cultural, material and environmental terms).

A few additional sources, most on the seminar shelf with other books:
* Hilary French, *Key Urban Housing in the Twentieth Century* (New York, 2008)
* David Mackay, *Multiple Family Housing: From Aggregation to Integration* (NY, 1977)
* Claudia Qjriny et al., eds., *Ernst May: 1896-1970* (Munich, 2011)
* Nicholas Bloom and Matthew Lasner, *Affordable Housing in New York* (Pr, 2016)

Week 5 (Oct. 4): Modern Standards, Innovations and Adaptations

* Barry Bergdoll and Peter Christensen, eds., *Home Delivery: Fabricating the Modern Dwelling* (New York, 2008), esp. pp. 009-037

Recommended:
* Ellen Lupton, *The Bathroom, the Kitchen and the Aesthetics of Waste* (NY, 1996)
* Graham Towers, *Shelter is Not Enough: Transforming Multi-Storey Housing* (B, 2000)
* Nicholas Bloom, et.al., eds., *Public Housing Myths* (Ithaca, 2015)
Week 6 (Oct. 11). American, European & Latin American Reforms

Hilary French, Key Urban Housing in the Twentieth Century (New York, 2008), skim
Wolfgang Förster and William Menking, Das Wiener Model/The Vienna Model: Housing for the Twenty-First City (Vienna, 2016), skim [on shelf]

Weeks 7-12 (Oct. 25 – Nov. 29): Student presentations

Presentations will be based on your research paper topics. (These can connect to present-day designs or policy proposals -- but the history is essential.) Please focus on particular places/projects for more general topic, highlighting specific examples. We’ll try for 4 presentations per session & a summary discussion.

Please give other students (and me!) some background reading beforehand. Make the work specific to a given national or urban culture, past or present. A brief handout with basic information, site plans, etc. is much appreciated. I’ll also give you downloads of some of excellent papers by previous students.

POSSIBLE TOPICS:
- Designing “Supportive Housing” -- and Full-Service Facilities
- Beyond the Nuclear Family: From “Multi-Family” to “Multi-Unit” Dwellings
- The Evolution and Future of Affordable Housing Policies
- How Particular Cities Affect Housing Policy (Vienna, SF, Shanghai, etc.)
- Live-Work Spaces for Various Kinds of Jobs
- Housing Options for Students and Young People
- Supportive Services in Designs for Housing the Formerly Homeless
- Pragmatic Adaptations to Preserve Utopian High-Rise Public Housing
- Designing Site Plans and Integrating with the World Beyond the Site
- Retrofitting the Suburbs
- High-Rise Housing in Shanghai, Hong Kong, Singapore or Other Asian Cities
- “Informal” Housing Reform in Barrios, Favelas, Bidonvilles, Dharavi, etc.
- Manufactured or Prefabricated Housing; New Materials (Plastics, Aluminum..)
- Housing for Immigrants, Past and Present, from Different Cultures
- Adaptive Reuse and Sustainable Design

Week 8 (Oct. 25):
Week 9 (Nov. 1):
Week 10 (Nov. 8): Election Day Holiday
Week 11 (Nov. 15):
Week 12 (Nov. 22):
Week 13 (Nov. 29): Summary and discussion of 21st-Century Housing
  Klaus Dormer, et.al., Housing for Everyone (M.,2014), pp. 20-36, 162-85

Papers are due Friday Dec. 15 at noon. They should be 10-15 pp. long, plus illustrations, footnotes and a bibliography. The earlier discussions should show in your clarifying an argument and possible suggestions for the future.
